

## Working Student WORKSHOP - 10-20 hours/week

Did you know there is a space start-up not far from **KIT** based in Lichtenau? Have you ever dreamed of working in a **NEW SPACE** company, conquering new challenges and working for a pioneering project?

We at **ATMOS Space Cargo GmbH** are developing the first inflatable Space Cargo return Capsule and therefore **ENABLE** life science in space to benefit everyone on earth.

You are studying engineering and love hands on work? Perfect! Currently there is an open working student position for our Workshop. You will be assisting our Head of Workshop Lars in all workshop matters: building, maintenance, testing, development and whatever else needs to be done in the workshop.

### Position requirements:

- It is a **hands-on** position and therefore mostly carried out on site.
- Experience in handling different (heavy duty) tools
- Good craftsmanship
- CAD (e.g. SolidWorks)
- We are currently in a hot phase of the development of the **PHOENIX** Capsule so: **RELIABILITY** is key for us
- **MOTIVATION**

### What we offer:

- Fair payment
- Excellent working atmosphere
- Dynamic and **INSPIRING** team
- **SPACE**
